

How to cite in Chicago style

The Chicago style was developed in 1906 by the University of Chicago in its first edition. The latest edition of the Chicago Manual of Style is the 17th and has been adapted to Spanish by the University of Deusto in its Manual de estilo Chicago Deusto. This standard is used and recommended for referencing documents in the areas of Humanities and Law. It is also used in the area of Social Sciences and Physical Sciences.

The structures and examples below have been created according to the Chicago format of the different document typologies: books and book chapters; websites, databases, software and mobile applications; journals and articles; doctoral theses and unpublished academic works; conferences; standards and patents; and legislation.

A tener en cuenta:

- The beginning of a bibliography is in alphabetical order. The first letter must correspond to the author's surname.
- All bibliographic entries end with a full stop except for web addresses.
- For entries in Spanish publications, only the first letter of the first word of the title will be capitalised. However, all words in an English title should be capitalised except for prepositions (in, on, by, at, etc.), articles (a, an, the) and coordinating conjunctions (and, but, or, for, as).
- If the work to be cited has 2 or 3 authors (or editors), they will be added in the order in which they appear on the title page. Only the name of the first author will be inverted. The rest of the authors will be written with their first and last names in this order. The conjunction **and** will be used.
- If the work to be cited has 4 or more authors (or editors), all authors will be cited. Only the name of the first author will be inverted.
- If the authorship is known or assumed but has been omitted from the title page, the name of the author is enclosed in square brackets.
- If there are no authors, the title will be the citation entry.
- If translators and/or editors are mentioned, they should be cited in full and the names should be cited in the order in which they appear on the original title page.
- For online resources, the access by which the resource was consulted must always be indicated (DOI, URL, etc.).

Legislation, legal texts

Chicago 17th edition does not contain specific indications on how to cite legal texts or case law at Spanish or European level.

The recommendations for the preparation of bibliographical references are:

- ❖ Prepare an annex of bibliography of legislation and an annex of bibliography of jurisprudence.
- ❖ The order of the citations shall be chronological, prioritising the most recent judgments, laws or other types of legal documents. The most up-to-date documentation shall be the last to be cited. In laws, the first information in the bibliographic reference will be the country or province where the law was drafted.

Examples:

- Organic Law
 - España. Ley 40/2015, de 2 de octubre, de Régimen Jurídico del Sector Público. Boletín Oficial del Estado, 2 de octubre del 2015, núm. 236, pp. 89411 a 89530.
